

General Data Protection Regulation (GDPR)

You will probably know that on 25th May 2018 Data Protection Law (DPL) was replaced by General Data Protection Regulation (GDPR) which has some implications for the Society.

As a result the Cheviot Sheep Society (CSS) has made changes to ensure the personal data it holds is handled correctly under GDPR.

Firstly, the CSS is required to ensure that the membership details it already holds are correct. This membership list and the data provided will only be used by the CSS to carry out the duties of the society and will **not** be given to a third party under any circumstances.

As a result will all members or prospective members please fully complete Part 1 of the enclosed form.

As many members are aware, the membership list in the 2017 Flock Book only contained the members' names and addresses, all telephone numbers and email addresses were withheld. **No membership list appeared in the 2018 Flock Book.**

Many members have in the past used this list to obtain a telephone number to phone another member. To provide this service to members, it is hoped to provide a membership list on a members page on our new website which would only be accessible by the individual member's unique password. **All companies who are members, but are not breeding Cheviot Sheep, will not have access to the members website page.**

To have a membership list on the members page under GDPR, the CSS needs each members written consent for their data to appear. Under no circumstances will the 'Secretary's Membership List' appear on a members page on the website en bloc. Every member has their own individual rights under GDPR, and only by giving written consent will their data appear on the website.

Under GDPR every individual will have the right to have part or all of the data shown on the website erased at any time by giving written notice.

As a result, will everyone please read carefully and complete Part 2 of the enclosed form and return it to the secretary as soon as possible.

Membership details
